DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1,3,4,5,6,10,12,17,19,23,25,27,28,30 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-21 of copending Application No. 10/159953. Although the conflicting claims are not identical, they are not patentably distinct from each other because the SN10/159953 claims a magnetic metal powder consisting of single crystal Fe (metal) particles having a coating layer thereon. The metal particles are of a spherical shape. The SN10/159953 does not specifically claim that such particles should be dispersed in a resin and used for composite magnetic, dielectric or electronic materials. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to use powders of SN10/159953 in the composite

materials, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice..

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 2,7-9,11,13-16,18,20-22,24,26,29,31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The amendments and remarks filed by applicants on July 17,2003 have been fully considered. The claims, however, remain unpatentable in view of the above rejections.
